

A global energy trade desk, non-sanctioned product only.

GasOilInc sources and trades non-sanctioned crude oil and refined derivative products worldwide — connecting verified supply to verified demand under strict due diligence, KYC/AML and sanctions compliance. This statement is a summary for procurement and counterparty review; commercial terms follow under NDA.

WHAT WE TRADE

UPSTREAM

Crude Oil

Non-sanctioned crude with verifiable chain of title, traded on standard terms.

- Light, medium and heavy grades
- FOB, CIF and delivered
- Spot cargoes and term contracts

MIDDLE DISTILLATES

Diesel — EN590 & ULSD

Our core refined product, to European and international specification.

- EN590 — 10ppm and 50ppm sulphur
- ULSD — ultra-low-sulphur diesel
- Transport, mining, power, industrial

AVIATION & GAS

Jet A-1, LNG & LPG

Aviation turbine fuel and liquefied gas for power and industry.

- Jet A-1 — aviation turbine fuel
- LNG cargoes and term supply
- LPG — propane, butane and mixes

HEAVY

Fuel Oil & Bunkers

Fuel oil and bunker grades for marine and heavy industry.

- Marine fuel oil
- Bunker grades
- Delivery into regional terminals

HOW A TRANSACTION RUNS

STAGE 01

Request

You submit product, grade, quantity, delivery terms, destination and timeline. A complete request avoids weeks of correspondence.

STAGE 02

Verification

Both sides screened — corporate identity, ultimate beneficial ownership, sanctions exposure. Chain of title verified before product is presented.

STAGE 03

Soft Offer

Indicative pricing, procedure and terms issued. Non-circumvention and non-disclosure protections put in place before counterparties are introduced.

STAGE 04

Contract

Sale and purchase agreement executed with agreed payment instrument, inspection regime and delivery schedule. Independent inspection at load and discharge.

STAGE 05

Delivery

Logistics through to discharge, documentary settlement and post-transaction reconciliation. Relationships built to repeat.

Every transaction is screened against applicable sanctions regimes before it proceeds. We decline business that cannot demonstrate clean origin and verifiable title, **regardless of margin.**

COMPLIANCE

CONTROL	STANDARD APPLIED
Product	Non-sanctioned only. Screened against applicable sanctions regimes before proceeding.
Counterparty	KYC/AML and UBO verification on both sides of every transaction, re-screened as circumstances change.
Title	Chain of title verified on the supply side before product is presented to a buyer.
Inspection	Independent third-party inspection at load and discharge as a standard contractual term.
Conduct	International best-practice non-circumvention and non-disclosure observed at all times.
